

ProntoWash®

The Global Leader in Eco Car Wash Services

Take advantage of being a green entity

ProntoWash, as a **USGBC Member**, can help any building increase the chances to get the **LEED Building Certification** (a rating government system in terms of how green efficient one company is), to achieve some points in the Water Efficient Category. ProntoWash service represents more than 40% of that category.

How your company can take advantage of being “GREEN”?

- Be recognized for the community like a Green Entity.
- Government benefits and initiatives.
- More business and exposure to the corporate and government sector.
